BLAST EXPERTISE

Unlocking Your
Operation's
True Potential

kemekltd.com

Our Refreshed Brand Future Focused

Irish Industrial Explosives Ltd (IIE) and Ulster Industrial Explosives Ltd (UIE) have been delivering technical services and commercial explosives to our customers for over 50 years.

To build on the heritage and reputation of both our businesses, we have jointly rebranded to Kemek. This name may sound familiar as Kemek is the original holding company name for IIE and UIE.

Our collective vision for Kemek is to be the leading provider of blasting expertise, superior services and products, partnering with our customers to fully unlock the potential of their operations.

The Rebranding Journey Embracing Change

The development of our single brand, identity and name change was a considered process.

Our stakeholders, including employees, wanted to ensure that the new Kemek brand retained the many positive attributes of both IIE and UIE. Kemek reflects the expertise, safety and quality standards demonstrated across our operations.

The new Kemek icon is representative of a blast, fired in a controlled format, it denotes accuracy and precision. It also takes its cue from the drone used by our Technical Service team to capture images when surveying a blast area. The back-to-back K is an acknowledgement of the company's heritage and is a play on Kemek as a palindrome. Our tagline 'Blast Expertise' is clear, it's what we deliver to you.

Expert Services for Every Blast

At Kemek we bring expertise from manufacturing to blasting. Our team of industry-qualified engineers and blasting professionals, with experience across quarry, mining and civil engineering operations, will unlock and extract the full potential of your site. Leveraging the latest technology, we can provide 3D digital modeling and drone footage to map your site and to evaluate the life cycle of your operation.

Our services include:

Core Services

- 3D Surveying
- Blast Design
- Explosive Supervision
- Post-Drill Surveying
- Product Delivery
- Shotfiring
- Environmental Monitoring

Additional Services

- Quarry Reserve Estimation
- Stockpile Volume Calculations
- Development & Planning Support
- Boundary Inspections

Products

- Kemex (Emulsion/AN Blend)
- Ammogex (ANFO)
- Cartridge Explosives
- Shock Tube Detonators
- Electronic Detonators
- Electric Detonators
- Cast Primers
- Detonating Cord

Delivering Safely

With over 50 years of blast experience, an exemplary safety record and a talented inhouse team, safety is our number one priority at Kemek.

We strive for excellence; our mutual well-being depends on attention to detail.

Kemek's Safety Ambassador Programme identifies employee behaviour as critical to our safety performance and encourages all team members to take greater responsibility for their own safety and for the welfare of those around them. We adhere to the latest global and local standards to drive continuous improvement.

The emulsion we use is manufactured to the ISO9001 Quality Management Standard. Our certification in

ISO45001 for Occupational Health & Safety Management, with the implementation of our Environmental Management Systems, provides our team with robust frameworks to carry out their tasks safely and effectively. Through delivering our core values our employees ensure that we are committed to your safety and ours, whilst providing you with expert insights and superior services.

Kemek Core Values

- Safety
- Integrity
- Customer Focus
- Teamwork
- Excellence

How We Work With You

You can trust the Kemek Way to bring professionalism, efficiency and consistency to your blast. Kemek brings global standards and technical expertise to your operations using the very latest in blasting technology, to ensure your site's potential is unlocked, extracted and delivered, safely and securely, every time.

We work to develop opportunities for your business across transport infrastructure, quarrying and mining operations.

Expertise & Experience: A Team of Professionals

Kemek has been part of infrastructure developments across the Island of Ireland for over 50 years. We're continually combining our experience with innovation to deliver on a wide range of projects.

Kemek is synonymous with quality products and personal service. Our highly experienced team leverages insights and integrates digital tools to advance your activities on-site. Working in partnership with you, we safely and securely deliver our services and streamline your processes. With an exemplary track record and expert in-house team, we understand your operation's potential. Our forward focused outlook, matched with experience and expertise, ensures we are continuously advancing to develop better business practices and deliver meaningful impact for your business.

Our team is the bedrock of our business. Kemek's true strength lies within its people. We are steadfast in our commitment to consistently train and develop our workforce across production, service delivery, technical services, and supporting functions. This strategic focus empowers us to drive our business and yours forward.
